## SKILLS

**Languages:** Javascript, Typescript, Python

**Web Development:** NextJs, ReactJs, Redux, Redux Toolkit, HTML5, SCSS, CSS3, NodeJs, ExpressJS, Cypress, Jest

**Security** XSS, CSRF, input Sanitization, Dependency Injections.

**Technology:** Git, Github, Jira, Figma, Docker, MongoDB, GraphQL

## WORK EXPERIENCE

### GSYNERGY INDIA LLP | ASSOCIATE SOFTWARE ENGINEER

Remote, DL | Nov 2023 – Dec 2024

- Contributed to a VSCode extension that generated and validated over **500 JSON** model files, maintaining **100%** consistency and accuracy in model creation.
- Played a key role in the development of a full-stack e-commerce application, utilizing **GraphQL APIs** to reduce data-fetching time by **22%** and enhance overall application performance.
- Conducted performance optimizations in React, reducing re-renders by 40% through state management, memoization, and efficient component updates, resulting in a **20%** faster and more responsive UI.
- Implemented **ag-grid** to display data efficiently and created **reusable ag-grid components** for editor cells and renderer cells, improving code maintainability and reusability.

### MISEMIND TECHNOLOGIES | SOFTWARE ENGINEER

India, DL | Nov 2020 - Nov 2023

- Translate Figma designs into responsive and adaptive user interfaces, delivering a consistent and flawless user experience across various devices and platforms.
- Skillfully developed and managed reusable ReactJS components, simplifying workflows and increasing codebase efficiency by **15%**.
- Leverage advanced optimization strategies to enhance front-end performance, achieving up to **30%** faster load times and ensuring fluid and seamless user interactions.

## PROJECTS

### PERSONAL PORTFOLIO

NEXTJS, REACTJS, TYPESCRIPT, TAILWINDCSS

- Took on a challenging project as a self-initiative to improve web development skills.
- Inspired by unique designs found online, created a modern and visually engaging portfolio.
- Pushed creative and technical boundaries to enhance both design and functionality.

### HEMOLINK (BLOOD DONER/PLASMA DONER)

REACT, JAVASCRIPT, EXPRESSJS, MONGODB, AUTH0,

- Started during the pandemic as a mission-driven project to connect users with blood donors, addressing a critical need.
- Integrated real-time data from government websites to display hospital names and available blood types.
- Ensured users have up-to-date information when seeking donations, improving access to life-saving resources.

### BLOG, JUSTSCRIPT

REACT, REDUX, TYPESCRIPT, EXPRESSJS, JWT, MONGODB

- Created an open platform dedicated to sharing valuable tips, tricks, and insights for JavaScript and Python enthusiasts.
- Fostered learning and community engagement by providing a space for users to collaborate.
- Enabled users to contribute their own experiences and solutions, promoting knowledge sharing and growth.

## EDUCATION

**MCA, Computer Science and Information Technology**  
JAIN (DEEMED TO BE UNIVERSITY)

India, BLR | Jan 2022 - Apr 2024
